About JeskeLL Systems

For more than 35 years, JeskeLL has supported Federal organizations with secure, scalable, and resilient technology solutions designed to modernize infrastructure, protect critical data, and support evolving mission requirements. JeskeLL specializes in data lifecycle management, enterprise storage, cyber resilience, AI-ready infrastructure, hybrid cloud technologies, and high-performance computing.

As a trusted partner to leading technology manufacturers, JeskeLL helps agencies turn complex infrastructure requirements into practical, mission-ready solutions. Our team brings deep experience supporting Federal environments where performance, data integrity, availability, and long-term lifecycle management are essential to mission success.

What Is in Scope for SEWP VI

NASA SEWP VI provides a broad range of Information Technology, Communication, and Audio-Visual (ITC/AV) solutions and services. The contract includes three scope categories:

Category A: ITC/AV Solutions

Category B: Enterprise-wide ITC/AV Service Solutions

Category C: Mission-based ITC/AV Service Solutions

JeskeLL Systems is a **Category A Contract Holder**. For help determining whether a requirement is within SEWP VI scope, customers may send an overview and/or bill of materials to help@sewp.nasa.gov.

How to Obtain a Quote

To request a SEWP quote directly from JeskeLL Systems, contact our SEWP Program Manager or Deputy Program Manager. Our team can assist with identifying solutions available under JeskeLL's SEWP VI contract and navigating the quote and ordering process.

Fair Opportunity and Requests for Quotes

FAR 16.505(b)(1) provides that each contractor shall be given fair opportunity to be considered for each order exceeding \$10,000 issued under multiple-award contracts. The method used to obtain fair opportunity is at the discretion of the Contracting Officer, who must document the rationale for placement and price of each order.

Use of the SEWP online Quote Request Tool (QRT) is the recommended method to support this activity and required decision documentation. The QRT automatically includes Contract Holders within the selected group or based on a suggested source.

SEWP VI Ordering Process

Each agency's internal ordering process varies. Generally, an end user identifies a requirement and generates a Purchase Request (PR), which is submitted with funding information to the agency's procurement office. The procurement office then issues the applicable Delivery Order (DO).

The NASA SEWP Program Management Office does not issue Delivery Orders. The SEWP PMO reviews, processes, and tracks issued orders and forwards them to the appropriate Contract Holder. Agencies remain responsible for following their own policies and procedures. Modifications to SEWP orders must also route through the SEWP PMO.

SEWP VI Solutions from JeskeLL

Federal agencies can use JeskeLL's SEWP VI contract to address data growth, infrastructure modernization, cyber resilience, performance, scalability, and mission continuity. JeskeLL's expertise includes enterprise storage and data management, data lifecycle management, cyber resilience and data protection, AI-ready infrastructure, hybrid cloud technologies, high-performance computing and storage, IT modernization, and systems integration.
